BOB WILLIAMS APPOINTED TO CABA BOARD OF DIRECTORS

October 1, 2001

Invensys Energy Solutions, an operating group of Invensys plc, focused to help customers manage energy efficiently, today announced that Bob Williams, Vice President, has been named to the Board of Directors of CABA, North America's leading home and building automation industry association. Mr. Williams joins an elite group of industry leaders in shaping the future of the automation industry that is seeing exponential growth in smart homes, wired communities, and automated commercial and industrial installations.

"We're honored to welcome Bob Williams to our Board," said CABA President Ron Zimmer. "His energy expertise, and Invensys' broad range of market-focused solutions, opens a huge opportunity for energy efficiency improvements resulting in operational cost savings for our members and is therefore of great interest to CABA."

CABA's members include manufacturers, dealers, installers, telecommunications companies, energy utilities, builders, consultants, research organizations, publishers, educational institutions, governments and associations.

"I am very pleased with the appointment to the CABA Board," said Invensys VP, Bob Williams. "Invensys companies have long been supporters of CABA and their leadership in the automated buildings industry. We are enthusiastic about strengthening our relationship with CABA and look forward to a long and mutually-rewarding relationship."

Bob Williams is Vice President of Marketing and Business Development for the global operations of Invensys Energy Solutions. This responsibility includes key account and market growth programs through the integration of products and services to meet the needs of specific market segments. Some of the products and services include commercial building controls and automation, energy management and monitoring, meters and meter reading services and local on-site power generation.

Bob Williams is also a member of the executive steering committee for the Council on Tall Buildings and Urban Habitat and Conference Co-Chair of the "Building for the 21st Century" global conference to be held in London in December, 2001. More information on this conference, which is sponsored in part by CABA, can be attained at www.buildingforthe21stcentury.com.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.

About Invensys

Invensys plc is a global leader in the automation and controls industry. With its head office in London, it operates in all regions of the world through four focused divisions - Software Systems, Automation Systems, Power Systems and Control Systems. With over 80,000 employees, the company's products and services range from advanced control systems and networks for automating industrial plants and controlling the environments of buildings, to electronic devices and controls found in residential buildings and light commercial applications, plus complete power systems for the telecommunications and information technology industries.
