HONEYWELL, CISCO AND INVENSYS JOIN CABA BOARD OF DIRECTORS

November 15, 2001

CABA is pleased to announce the recent appointment of three new members to its Board of Directors.

In October 2001, Nicholas Price, from Honeywell's Home and Building Control Business, Kristine Stewart of Cisco Systems, Inc. and Bob Williams, from Invensys Energy Solutions, joined an elite group of industry leaders dedicated to the advancement of home and building automation. By joining the CABA Board of Directors, all three have committed to apply their vast skills and knowledge to encourage the greater development and promotion of integrated systems and automation in homes and buildings throughout North America and worldwide.

By joining the board, Mr. Price, currently a Vice-President and General Manager at Honeywell's Home and Building Control unit, brings over 15 years of experience to the fore. He provides leadership for sales and operations in automation systems, fire and security, energy retrofit and maintenance services for new and existing commercial buildings. He is also responsible for implementing new initiatives to maximize performance and meet customers' needs.

"The addition of Nicholas Price and Honeywell to the CABA Board of Directors is a great asset to our organization," said Ronald J. Zimmer, President & CEO of CABA. "His knowledge and expertise will greatly enrich the value of the Association and its membership."

CABA is also pleased to welcome Kristine Stewart to its Board. Kristine Stewart heads up market development efforts for the Cisco Commercial Line of Business, with ownership for Programs and Strategic Alliances. Her group is responsible for defining marketing initiatives and directing the relationships with all solution providers and channels delivering products and/or services in the consumer and residential space.

"Both Cisco and CABA understand that secure, high-speed Internet access is essential whether you are at work, on the move or at home," said Stewart. "I am pleased to be working with CABA to further our common vision of broadband communications that is available everywhere, all the time, to expand both the consumer Internet lifestyle and commercial investments in building automation." Kristine also brings a strong link to the Internet Home Alliance, as she is Vice-President of the IHA.

CABA is further quite pleased to announce the addition of Bob Williams, Vice President of Marketing and Business Development for Invensys Energy Solutions to the Board. Mr. Williams' responsibility includes key account and market growth programs through the integration of products and services to meet the needs of specific market segments. Some of the products and services include commercial building controls and

automation, energy management and monitoring, meters and meter reading services and local on-site power generation.

"We're honored to welcome Bob Williams to our Board," said Zimmer. "His energy expertise, and Invensys' broad range of market-focused solutions, opens a huge opportunity for energy efficiency improvements resulting in operational cost savings for our members and is therefore of great interest to CABA."

With the addition of these new board members, Zimmer expects CABA's expertise in home and building automation to expand equally, adding greater value to membership.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.

About Honeywell

Honeywell is a US\$25-billion diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; power generation systems; specialty chemicals; fibers; plastics; and electronic and advanced materials. Honeywell employs approximately 120,000 people in 95 countries and is traded on the New York Stock Exchange under the symbol HON, as well as on the London, Chicago and Pacific stock exchanges. It is one of the 30 stocks that make up the Dow Jones Industrial Average and is also a component of the Standard & Poor's 500 Index. For more information on Honeywell, please visit www.honeywell.com.

About Cisco Systems, Inc.

Cisco Systems, Inc. is a worldwide leader in networking for the Internet. Cisco provides the broadest line of solutions for transporting data, voice and video within buildings, across campuses, or around the world. Cisco solutions ensure that networks both public and private operate with maximum performance, security, and flexibility. In addition, Cisco solutions are the basis for most large, complex networks used by corporations, public institutions, telecommunication companies, and are found in a growing number of medium-sized commercial enterprises. .
