RON WILSON, VANTAGE CONTROLS CEO, ELECTED TO CABA BOARD OF DIRECTORS

January 9, 2002

Vantage Controls Corporation and the Continental Automated Buildings Association (CABA) are pleased to announce the election of Ronald Wilson to the CABA Board of Directors. Wilson, CEO of Vantage Controls, was selected as one of the newest board members because of his extensive experience and expertise in the home automation market.

Wilson served in a faculty position at Brigham Young University and was responsible for directing diagnostics and research on the University's Topolotron fusion reactor project. He has done extensive research in thin films, polycrystalline materials and field emission. Wilson has also designed specialized test and measurement instruments used by NASA in the space shuttle program and the space station project. He co-founded TransEra Corporation in 1976 and has served as its President and CEO since then. Wilson's primary involvement in home automation began in 1993 when he and the TransEra Corporation acquired Vantage Controls.

Wilson's experience will compliment the CABA organization that was established to promote the advancement of technologies for home and building automation. Ronald J. Zimmer, CABA's President & CEO, said the organization now has more than 300 corporate members and is managed by a board of select industry leaders. With the addition of Wilson, the board now consists of 17 members.

"Vantage is a well respected company with world-class products and Ron Wilson has been an integral part of its growth," said Zimmer. "Ron Wilson brings a great deal of technical expertise and knowledge the CABA Board that will help us fulfill our goals and objectives."

As CEO of Vantage Controls, Ron Wilson provides strategic direction and technical leadership in the development of its wireless automation, communication, networking, and display products. He has been involved with the lighting control and commercial and home automation industry for more than 20 years. Wilson said this election to the CABA Board is a major stepping-stone in his continuing goal to take an active part in the advancement and promotion of home automation technology.

"I am grateful for the honor of being elected to the CABA Board," said Wilson. "I think it is a great opportunity to promote the use of automation technology in all aspects of home and office life. Vantage has enjoyed an association with CABA for a number of years and I look forward to working more closely with such an esteemed organization."

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
