CABA ANNOUNCES ENERGY MANAGEMENT SUMMIT FOR INTELLIGENT BUILDINGS

February 17, 2003

The Continental Automated Buildings Association (CABA) has announced that it will collocate its "Energy Management Summit for Intelligent Buildings" at Realcomm 2003, a commercial real estate automation and business solutions conference.

The Summit, to be held in Chicago, IL, on June 3, 2003, will feature sessions that focus on intelligent building technologies that explicitly reduce building energy costs, increase energy efficiency and create return-on-investment.

"Energy management is critical to our future economic prosperity and environmental well being," states Ronald J. Zimmer, CABA President & CEO. "It is CABA's intention to attract industry leaders to this Summit who encourage the development and promotion of integrated systems and automation in large buildings for the promotion of energy efficiency."

CABA's Energy Management Summit for Intelligent Buildings will bring together related "large building" stakeholder groups that have an interest in the integrated systems and automation technologies which monitor and manage energy consumption.

"We are pleased that CABA has selected Realcomm as the location for its Energy Summit and that the organization has joined us as an Association Partner," states Howard Berger, Realcomm's Director of Technology Showcases. "CABA is recognized as North America's leading information source for building automation. The strategic collocation of CABA's Energy Summit at Realcomm 2003 will provide our attendees with an additional source of intelligence in the fast changing world of commercial real estate automation."

Attendees to the Summit will include Realcomm attendees and current members of CABA's Intelligent & Integrated Building Council, which was established in November 2001 to monitor initiatives that relate to integrated systems and automation in the "large building" sector.

The large building industry at large is invited to join CABA's Intelligent & Integrated Building Council and participate at the Energy Management Summit for Intelligent Buildings.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
