CABA & REALCOMM PROVIDE WORLD-CLASS ROSTER OF SPEAKERS IN CHICAGO

April 14, 2003

CABA is pleased to announce that it has retained a world-class roster of speakers for its Energy Management Summit for Intelligent Buildings.

The aim of CABA's Energy Management Summit for Intelligent Buildings is to bring together related "large building" stakeholder groups that have an interest in the integrated systems and automation technologies, which monitor and manage energy consumption.

"CABA will be bringing together many of the top speakers and organizations involved with energy management within buildings," said Ron Zimmer, CABA President & CEO. "Attendees will certainly profit by learning about the latest energy management products, services, programs and initiatives."

Currently CABA has confirmed the following speakers:

- Frank Frankini, Senior Vice President - Development & Energy Operations at Equity Office Properties;
- Steve Kapp, Energy Engineer, San Diego Regional Energy Office;
- Larry Luskay, P.E., Project Engineer at Portland Energy Conservation Inc. (PECI);
- Rich Rogan, Honeywell;
- Robert D. Sauchelli, National Program Manager for the U.S. Environmental Protection Agency's Energy Star Partnership;
- David Watson, Environmental Energy Tech., Lawrence Berkeley National Laboratory;
- Alan Whitson, President, The Corporate Realty, Design & Management Institute

Efficient use of energy, utilization of renewable energy systems, sustainable management of resources and the application of intelligent building technologies will be the topics of their presentations at the one-day event to be held in Chicago, IL on June 3, 2003.

CABA's Energy Management Summit for Intelligent Buildings is determined to feature the most relevant, cutting-edge sessions on intelligent building technologies that explicitly reduce building energy costs, increase energy efficiency and create return-on-investment.

The event will be collocated at Realcomm 2003: The Commercial Real Estate Automation and Business Solutions Conference. The strategic collocation of CABA's Energy Summit at Realcomm 2003 will provide all attendees with an additional source of intelligence in the fast changing world of commercial real estate automation. Realcomm is a well-recognized event that will be held directly after the Summit.

Realcomm will hold an intelligent building education track on Wednesday and Thursday that will focus on all aspects of the intelligent, next generation, high performance, smart, digital building. Everything from IP-based utility management to digital signage network technology will be featured. Also new to the tradeshow floor this year is the Intelligent Building Pavilion, which will feature 20+ vendors that have products and services focused on building automation and operations software.

"We are pleased that CABA has selected Realcomm as the location for its Energy Summit and that the organization has joined us as an Association Partner," states Howard Berger, Realcomm's Director of Technology Showcases. "CABA is recognized as North America's leading information source for building automation. The strategic collocation of CABA's Energy Summit at Realcomm 2003 will provide our attendees with an additional source of intelligence in the fast changing world of commercial real estate automation."

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
