DAVID GILL OF INVENSYS CONTROLS APPOINTED TO CABA BOARD OF DIRECTORS

December 12, 2005

CABA is pleased to announce the appointment of David Gill of Invensys Controls to its Board of Directors.

"I am very pleased that David Gill has joined our Board," said Ron Zimmer, CABA President & CEO. "His contribution to our work will ensure strong representation from an active manufacturer of high-quality building controls and other integrated products."

David Gill replaces Jim Devlin, who recently retired from Invensys. Mr. Gill is Global Marketing Director for Invensys Building Systems. In this role, Gill is responsible for Strategic Planning, Product Marketing, Marketing Services and Channel Management for Invensys Building Systems independent partner, distributor and OEM channels. Prior to this, he held several positions within the North American Building Systems organization, including serving as Vice President-Branch Sales, and in director roles in sales and marketing after joining the company in 1994.

In addition to his career at Invensys Controls, he spent 16 years with Johnson Controls Inc., with sales and management postings in Vancouver, Regina, Philadelphia and Cleveland.

Mr. Gill has been active in open system and integration initiatives throughout his career, with significant activity centered on new product development and market launches for Invensys' I/A Series® LonWorks™ and BACnet™ product lines. In addition, he has been active with promoting security, lighting and ancillary equipment integrations and alliance partnerships.

"I am looking forward to working with CABA to contribute to the development and application of technology and automation solutions that will improve the comfort, productivity and efficiency of today's buildings," states Gill. "CABA contributes an important perspective to our industry, bringing a unique mix of companies, individuals and organizations together to advance the adoption of home and building automation solutions."

Mr. Gill is a member of ASHRAE and a past board member of the National Association of Energy Service Companies (NAESCO). He received a B.A.Sc. in Electrical Engineering from the University of British Columbia.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
