CABA JOINS ENERGY STAR AS ASSOCIATION PARTNER

February 14, 2008

The Continental Automated Buildings Association (CABA) has recently been accepted as an ENERGY STAR Association Partner.

As an ENERGY STAR Association Partner, CABA will promote buildings, products, homes, and industrial facilities that use less energy while providing the same or better performance than conventional designs.

As North America's only not-for-profit industry association dedicated to providing information, education and networking opportunities relating to home and building automation, CABA will encourage its members to measure and track the energy performance of facilities where possible by using tools such as those offered through ENERGY STAR.

CABA will also take action to develop and implement plans consistent with the ENERGY STAR Energy Management guidelines to achieve energy savings and help spread the message about the importance of energy efficiency.

"We are pleased that we have been accepted as an ENERGY STAR Association Partner," said Ronald J. Zimmer, CABA President & CEO. "We are committed to supporting ENERGY STAR goals. As an ENERGY STAR Partner we support and endorse ENERGY STAR and its fundamental commitment to help protect the environment through the promotion of superior energy performance in commercial, industrial and institutional buildings."

Under terms of the partnership, CABA will support the ENERGY STAR Challenge, a call-to-action to help improve the energy efficiency of America's commercial and industrial buildings by 10 per cent.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
