BAE SYSTEMS EXECUTIVE JOINS CABA BOARD OF DIRECTORS

March 6, 2008

The Continental Automated Buildings Association (CABA) announced today the addition of an executive from BAE Systems to its Board of Directors. CABA is a trade association that promotes advanced technologies for integrated systems and the automation of homes and buildings.

Lari D. Anderson, Vice President for Strategic Development in the company's Information Technology line of business, will represent BAE Systems on CABA's Board. BAE Systems is a global company engaged in the development, delivery and support of advanced defense and aerospace systems in the air, on land and at sea.

"The addition of Lari Anderson and BAE Systems to the CABA Board of Directors is a great asset to our organization," said Ronald J. Zimmer, President & CEO of CABA. "His knowledge and expertise will greatly enrich the value of the Association and its membership."

Anderson's career experience has covered all aspects of the system development life cycle with specific emphasis on requirements engineering, configuration management, systems testing and system deployment and installation. He has been responsible for the leadership of a large systems organization responsible for software development, IT infrastructure operations, performance measurement, capacity planning, and resource planning. With BAE Systems, he has most recently focused his attention on strategic planning and business initiatives that diversify the company's offerings and markets. Previously, Anderson held positions of increasing responsibility with the Defense Intelligence Agency in Washington, DC.

"I am looking forward to helping to assure that a strong voice is raised on issues concerning the ability of large buildings to provide more productive and secure environments through the cost-effective use of information technology. Commercial buildings are complex information environments in which systems need to be integrated and interoperable in order to generate an attractive return on investment for both building owners and tenants," said Anderson.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
