## **ROY KOLASA OF HONEYWELL APPOINTED CHAIRMAN OF CABA'S INTELLIGENT & INTEGRATED BUILDINGS COUNCIL**

April 11, 2008

The Continental Automated Buildings Association (CABA) announced today that Roy Kolasa, Open System Solutions Manager at Honeywell Building Solutions and CABA Board member, has been appointed Chairman of CABA's Intelligent & Integrated Buildings Council.

The Intelligent & Integrated Buildings Council works to strengthen the large building automation industry through innovative technology-driven research projects. As Chair of the Council, Kolasa will guide the review of specific opportunities, and develop and monitor initiatives that relate to integrated systems and automation in the large building sector.

"CABA is honored to have Roy Kolasa serve as the new Chair of its Intelligent & Integrated Buildings Council. He brings an incredible wealth of knowledge and insight into how integrated solutions impact buildings, and his leadership and management experience will be a tremendous asset," stated Ronald J. Zimmer, CABA President & CEO.

Currently, Kolasa manages the development of integrated solutions for the Honeywell Enterprise Buildings Integrator™ and ComfortPoint™ control platforms. In addition to recommending how to specify, design, implement and maintain interoperable systems, Kolasa devotes time to educating customers and industry organizations on current technology and the benefits of linking building automation, fire and life safety, security and access control, and energy management solutions.

Kolasa succeeds Tom Lohner, P.E., Vice President, TENG Solutions, who held the position for over five years and who will continue serving on the Council as Past Chair. Under Lohner's leadership, the Council produced CABA's Intelligent Building Roadmap and guided the development of the Building Intelligence Quotient and Life-Cycle Costs tool. Lohner will continue to offer support by providing leadership on Council task forces that deal with green building initiatives.

"I am glad to have the opportunity to lead CABA's Intelligent & Integrated Buildings Council," said Kolasa. "Over the past several years, Tom and the Council have developed successful research and networking opportunities for the industry. And we look forward to building on that foundation with activities focused on green design, energy savings and sustainability, and collaborating with other leading industry organizations."

### **About CABA**

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at [www.caba.org](http://www.caba.org).
