CABA TO OFFER CABLING RESOURCE GUIDE

May 13, 2008

The Continental Automated Buildings Association is pleased to announce it is collaborating with the Communication Planning Corporation to offer the CABA membership a Cabling Resource Guide.

This free guide will provide CABA members with the most in-depth, reliable and up-to-date structured cabling resource available. The Cabling Resource Guide contains project checklists, codes, standards information, and product and design guidelines.

"We understand that structured wiring is a lucrative opportunity for cable installers, electricians, IT managers, and telecom equipment manufacturers," states Ronald J. Zimmer, CABA President & CEO. "CABA is pleased to add value to its research offerings by providing this new resource to its membership."

The research guide will examine all the constituent components of structured cabling infrastructure, including: power, communications, control, security and life safety systems. The goal of the guide is to be the best compilation of information needed to address today's structured cabling infrastructure challenges.

"In 2005, the Communication Planning Corporation initiated a program to develop the ultimate cabling resource guide for both the contractor and consumer. We approached many resources and companies to obtain the best industry intelligence," says Frank Bisbee, President, Communication Planning Corporation. "After three years of diligent research we have gathered and assembled an excellent set of guidelines dealing with the infrastructure required to bring together all of the components of an intelligent building."

Through an exclusive distribution license, CABA will distribute the guide, as prepared by the Communication Planning Corporation to its diverse membership.

"CABA expresses its strongest appreciation to the Communication Planning Corporation for furnishing and allowing us to distribute this guide on a complimentary basis to CABA members," says Zimmer.

For more information on obtaining a copy of the Cabling Resource Guide, please contact Fred Bryson, CABA's Business Development Manager at bryson@caba.org or contact the CABA office at 888.798.2222 or 613.686.1814 (x226).

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.

About Communication Planning Corporation
