CABA JOINS HIGH-PERFORMANCE COMMERCIAL GREEN BUILDING PARTNERSHIP

March 2, 2009

The Continental Automated Buildings Association is pleased to announce that it has joined the High-Performance Commercial Green Building Partnership.

The American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) established the Partnership to bring together leading organizations across all aspects of the building community to further the development of high-performance buildings throughout the United States.

The Partnership's key objective is to assist and advise the U.S. Department of Energy in the adoption of technologies, tools, and processes necessary to achieve net-zero energy performance levels in commercial buildings. In addition, the Partnership is working to assemble a resource network of individual design professionals and construction companies, universities, utility companies, agencies, manufacturers and other parties that have demonstrated leadership in the promotion of high performance and sustainable buildings.

"As the global leader in the provision of building automation research, information and analysis, we believe that the Partnership's commitment to provide guidance and technical leadership on key sustainability issues will play a major role in the development of the intelligent building of the future," said Ronald J. Zimmer, CABA President & CEO. "As a result, the Continental Automated Buildings Association is proud to participate as a member, reflecting our commitment to advancing the wide development and adoption of interoperable, sustainable, high-performance buildings."

Tim Kensok of AirAdvice, Inc. will be CABA's representative to the High-Performance Commercial Green Building Partnership. For more information about the Partnership, visit www.hpcgbp.org.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
