TOM LEONARD OF LEVITON JOINS CABA BOARD

August 19, 2009

CABA is pleased to announce that Tom Leonard of Leviton Manufacturing Company has been appointed to its Board of Directors.

Tom Leonard is Senior Director of Marketing and Product Management for Leviton Manufacturing Company, Lighting Management Systems Business Unit.

He has led the commercialization of numerous products designed to speed the adoption of energy management control devices in both new and existing buildings, the latest of which is a Leviton's Enocan enabled occupant sensing and lighting control system.

"We are extraordinarily pleased to have persuaded Mr. Leonard to serve on the CABA Board of Directors," stated Ronald J. Zimmer, CABA President & CEO. "He is a great strategic leader and will bring his vision and his wealth of experience from his current executive leadership role in marketing and product development."

A graduate of Gonzaga University, Leonard has been involved in the development, specification and marketing of energy management lighting control products for over 20 years with Leviton, and was previously with the Boeing Commercial Airplane Company.

"I'm particularly gratified that I will be able to bring my industry experience to the table," stated Leonard. "CABA is committed to growing both the home and building automation industry and I look forward to making a substantive contribution to its efforts."

Leonard replaces Dr. Jack K. Merrow, who previously served as Leviton's representative on CABA Board until his retirement.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at www.caba.org.
