CABA Signs Liaison Agreement with Digital Living Network Alliance

December 9, 2010

The Continental Automated Buildings Association (CABA), an international non-profit association dedicated to the advancement of intelligent home and building technologies, has entered into a liaison agreement with the Digital Living Network Alliance (DLNA), a non-profit collaborative trade organization comprised of more than 200 global member companies in the mobile, consumer electronics, PC, and service provider industries. This agreement will allow both organizations to mutually co-operate and exchange research, information and industry intelligence as well as develop original research projects surrounding the digital home.

“It is very evident that effective collaboration is key to strengthening the residential systems industry and creating maximum choice for the technology consumer,” stated Ronald J. Zimmer, CABA President & CEO. “We are consequently grateful that we can enhance our collaborative efforts through an agreement with the Digital Living Network Alliance.”

DLNA member companies share a vision of an interoperable network of personal computers, consumer electronics, mobile devices and service providers in the home, enabling a seamless environment for sharing and growing new digital media and content services. Products that carry the DLNA Certified® logo have passed rigorous DLNA Certification testing and have met all the DLNA guidelines for the device class or classes of that product. The DLNA Certified® logo appears on more than 8,500 devices from the world’s leading manufacturers. Consumers can look for the DLNA Certified® logo when selecting products from leading retailers or online stores to meet their digital entertainment needs.

“Both CABA and DLNA bring together global consumer electronics leaders who are shaping the future of the fully connected digital home, and we look forward to working with CABA,” said Nidhish Parikh, chairman of the DLNA Board of Directors and president of DLNA.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
