CABA Enters Into Agreement with OSGi Alliance

December 15, 2010

The Continental Automated Buildings Association is pleased to have entered into a supporter member agreement with the OSGi Alliance.

OSGi Alliance members develop and facilitate the deployment of OSGi specifications, which serve as the platform for universal middleware in server and embedded environments. Deployment of the open standard greatly increases the value of a wide range of computers and devices that use the Java platform.

OSGi technology is a component integration platform with a service-oriented architecture and lifecycle capabilities that enable dynamic delivery of services. OSGi technology is shipping in millions of units worldwide, and is deployed by Fortune 100 companies in home, automotive, mobile and enterprise markets.

CABA is an international not-for-profit industry association dedicated to the advancement of intelligent home and intelligent building technologies.

Under the membership agreement, CABA members can participate in the requirements process, provide input into OSGi specification evolution and help define future capabilities and requirements for the OSGi specification. CABA will also receive discounts for OSGi workshops and community events.

“We are extremely pleased to have entered into a supporter agreement with OSGi Alliance,” stated Ronald J. Zimmer, CABA President & CEO. “This arrangement will allow CABA’s membership to forge greater linkages with the Alliance and add greater value to both organization’s’ respective member companies.”

“The addition of CABA to the OSGi Alliance membership roster demonstrates OSGi technology’s value to the home and building automation sector,” said Stan Moyer, president, OSGi Alliance. “Diverse development environments including home gateway and Internet cloud have embraced OSGi as the proven modularity standard for Java.”

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
