James Gilmore of Bell Canada Appointed to CABA Board

December 16, 2010

The Continental Automated Buildings Association is pleased to announce that James Gilmore, Director of Internet Performance within the Network Technology Department at Bell Canada, has been appointed to its Board of Directors.

Gilmore replaces Martin Cullum as Bell Canada's CABA Board representative, who recently retired from the CABA Board after eight years of service.

"We are pleased to welcome James to our Board," said Ronald J. Zimmer, CABA President & CEO. "He will bring extensive expertise to the Board and will be a valuable asset in helping CABA further its mandate as the knowledge-based forum for industry leaders who advance the use of technology and integrated systems in the global home and building industry."

CABA is a non-profit industry association that provides information, education, and networking opportunities to help promote advanced technologies for the automation of commercial buildings and homes throughout the world.

Gilmore is responsible for the development of solutions that help enhance and optimize the end-to-end performance of broadband and Internet services within the home and Bell's network.

Key areas of focus include intelligent application and traffic management, subscriber identity management, Internet video delivery and home networking.

Since joining Bell Canada in May 1997, Gilmore has held a number of diverse leadership positions building and managing Bell's next generation networks and services in Network Engineering, Operations, and IS/IT.

Gilmore holds a MBA from the Rotman School of Management at the University of Toronto and a Bachelor degree in Electrical Engineering from the University of Western Ontario.

Gilmore has also served on of the board of directors for a not-for-profit community organization that provided services to help seniors live at home longer.

"CABA contributes an important perspective to our industry, by bringing together a unique mix of companies, individuals and organizations to advance the adoption of home and building automation solutions," stated Gilmore. "I am looking forward to working with CABA to strengthen the organization's market research efforts, which serve to strengthen the application of technology and automation solutions that improve the comfort, productivity and efficiency of today's homes and buildings."

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
