Dr. Satyen Mukherjee Appointed CABA Chair

February 9, 2011

The Continental Automated Buildings Association (CABA) is pleased to announce that Dr. Satyen Mukherjee of Royal Philips Electronics has been appointed as the association's new Chairman of the Board. Dr. Mukherjee is currently Chief Scientist and Senior Director at Philips Research North America. In this position he drives the development of a comprehensive research strategy in the area of lighting controls systems and building wide energy management systems, where he identifies and drives cross program initiatives. He has been serving as a member of the Board of Directors of CABA for the past three years.

CABA is a non-profit industry association that provides information, education, and networking opportunities to help promote advanced technologies for the automation of commercial buildings and homes throughout the world.

"The appointment of Dr. Satyen Mukherjee as CABA's chair is a great development for the home and building automation industry," said CABA President & CEO Ronald J. Zimmer. "His considerable experience in developing actionable industry research makes him an excellent asset to the association and to the industry-at-large, as CABA moves forward with enhancing its own market research program."

Dr. Mukherjee replaces Martin Cullum of Bell Canada, who recently retired from the CABA Board after serving seven years as Board Chairman.

"I am very pleased to be able to actively contribute to the CABA Board and to be elevated to this prestigious position," stated Mukherjee. "CABA is a very important organization that represents the collective interests of both the home and building automation industry. It is an important industry network in and of itself which Philips is pleased to participate with."

More information on the career of Dr. Satyen Mukherjee can be found at www.caba.org.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
