Robinson Solutions Joins CABA Board of Directors

August 26, 2011

The Continental Automated Buildings Association is pleased to announce that Robinson Solutions has joined the organization's Board of Directors.

Robinson Solutions provides intelligent systems and services to support improved performance of its clients' operations and facilities across North America, while minimizing the resources they use. The firm integrates technologies, services and systems to optimize performance in safety, energy consumption, environmental control and asset management, facility support, production and productivity.

Ian Milne, Vice President for Robinson Solutions, will represent the company on the CABA Board.

"We are extremely excited about the addition of Robinson Solutions and Ian Milne to the CABA Board of Directors," stated Ronald J. Zimmer, CABA President & CEO. "Ian's extensive experience and strategic vision will be of enormous benefit as our organization continues to work on building up its strengths."

Milne was born in Montreal in 1951 and grew up in Calgary where he attended school. In 1972 he moved to Toronto where he began his career in the fire protection industry as a sales estimator. Over the next 35 years he moved up through various positions of increasing responsibility.

In 1997, Milne was promoted to the position of President SimplexGrinnell in Canada, a national fire protection contractor and subsidiary of Tyco International. During his time in Canada he was a director of the Toronto Construction Association and the Canadian Automatic Sprinkler Association (CASA) and received his Gold Seal Certification in project management from the Canadian Construction Association (CCA).

In 2002, he was promoted to the position of Managing Director of Tyco Services for Australia, New Zealand and Fiji. With 10,000 employees and more than 200 locations, Tyco Services was a leader in electronic security, fire protection, mechanical and electrical contracting and facilities management.

In 2007, Milne was appointed Vice President of worldwide fire operations for Tyco Fire and Security, based in Boca Raton, Florida. Milne joined FirstonSite Restoration, a national disaster response and restoration company in 2007 and served as CEO until August 2010.

"I am gratified to have the opportunity to serve on the CABA Board of Directors," stated Milne. "CABA is world-renown organization and is a perfect fit to help advance Robinson Solutions's facilities management business through industry networking and market research."

CABA is a nonprofit industry association that provides information, education, and networking to help promote advanced technologies for the automation of homes and buildings.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
