CABA to Present at the 2012 Broadband Communities Summit

April 11, 2012

The Continental Automated Buildings Association today announced its President & CEO, Ronald J. Zimmer, will present at the 2012 Broadband Communities Summit in Dallas Texas, April 24-April 26. Mr. Zimmer will participate in the Broadband and MTUs session, part of the event's Editor's Choice Track program. The session is scheduled for Thursday, April 26 at 11:10am CST.

The Broadband and MTUs session will address how the longtime staple of business broadband, the T1 line, is rapidly outliving its usefulness. Today's commercial tenants demand flexible, scalable bandwidth as well as a high degree of reliability. Owners of commercial properties are finding that, to attract and retain tenants, they must offer advanced communications services in their buildings, preferably over multiple, redundant pathways. Session attendees will learn how robust business broadband can create new opportunities for both service providers and property owners.

"I am extremely glad to be able to participate in this conference and share the latest research from our organization which is recognized as the world's most authoritative knowledge-based forum for advancing the application and integration of automation in the residential and commercial building industry," says Ronald J. Zimmer, CABA President & CEO. Mr. Zimmer will specifically examine the interplay of broadband and intelligent home and building technologies in his presentation.

"We have an outstanding line up of speakers and activities planned for this year's Summit and we are delighted to have Mr. Zimmer included on the program", states Scott DeGarmo, president and CEO of Broadband Communities. "Our extensive three-day agenda boasts five technical track programs, keynote addresses, special events and workshops and much more."

The Broadband Communities Summit will be held at the InterContinental Hotel – Dallas in Addison Texas. Visit <http://www.regonline.com/Register/Checkin.aspx?EventID=1013793> to register for the event or <http://www.bbcmag.com/2012s/> to learn more.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.

About the Broadband Communities Summit

The 2012 Broadband Communities Summit is part of the Broadband Communities' Town & Technologies series of events, focusing on Fiber-To-The-Home and next-generation access technologies for buildings, communities, and municipalities. The 2012 event marks the 8th annual Summit since launching the Towns & Technologies programs in 2004. The Summit exhibition has seen year on year growth with plans for over 80 exhibitors in 2012. What's more, the Summit technical program is unsurpassed in the industry with over 45 education sessions including keynote presentations on the latest and hottest industry topics.
