## **Jeffrey Donne of Robert Bosch, LLC Appointed to CABA Board**

November 19, 2013

The Continental Automated Buildings Association, a non-profit trade organization dedicated to the promotion of smart home technologies and integrated and intelligent building systems, is pleased to announce that Dr. Jeffrey Donne of Robert Bosch, LLC has been appointed to the CABA Board of Directors.

Bosch's core products are automotive components, industrial products and consumer goods and building products which include household appliances, power tools and security systems. Dr. Donne is head of the Bosch Research and Technology Center in Pittsburgh, where he directs a talented staff of researchers in Internet-related business for both technology solutions and innovation of new business models.

"I am delighted to welcome Dr. Donne to the CABA Board with his considerable experience in running an industrial research operation," stated Ronald J. Zimmer, CABA President & CEO. "With this appointment, we further strengthened our organization by emphasizing the importance of industrial and market research to the centrality of CABA's operations."

The research priorities of the Bosch Research and Technology Center include: software architecture, applications in data mining and machine learning, and deployment of new cybersecurity and privacy enhancing technologies and solutions supporting the Internet of Things architecture.

"I am excited to join the CABA Board," stated Dr. Donne. "The organization has operated an extensive and respected research program for a long time and I am gratified that Robert Bosch, LLC will have an opportunity to contribute to its overall direction."

Dr. Donne obtained his doctorate in Electrical Engineering from the Ohio State University. His academic achievements also include having been an adjunct professor at the University of Pittsburgh for nearly two decades. He also spoken at industry events and is scheduled to speak at the upcoming CABA's Intelligent Buildings & Digital Home Forum on November 19, 2013 at The Franklin Institute in Philadelphia. He will participate on a panel that will explore how cars are increasingly becoming an extension of the connected home. More information about the CABA Forum is available at: <http://www.caba.org/caba-forum>.

### **About CABA**

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at <http://www.caba.org/>.
