Clint Wheelock of Navigant Research Appointed to CABA Board of Directors

December 12, 2013

The Continental Automated Buildings Association is pleased to announce the appointment of Clint Wheelock to its Board of Directors.

Wheelock replaces Bob Gohn who previously represented Navigant Research on the CABA Board.

Wheelock is the managing director of Navigant Research. He leads all operations for the group, including management of its analyst team as well as client interactions and consulting engagements. His personal research focuses on smart grid technologies.

"Clint's strong leadership skills and industry expertise make him an excellent addition to our Board," said Ronald J. Zimmer, CABA President & CEO. "His solid approach fits perfectly with our culture, and we're looking forward to his contributions to our association."

Wheelock has an extensive background in market intelligence focused on emerging technologies, most recently serving as chief research officer for analyst firm ABI Research. Prior to that, he was vice president at the NPD Group and research director at In-Stat.

Previous positions also include senior product management and strategic marketing roles at Qwest Communications and Verizon Communications, as well as prior experience in management consulting and private investment banking.

"I am tremendously pleased and honored to have been selected to serve on CABA's Board," stated Wheelock. "CABA offers industry an excellent opportunity to collaborate and devise new methods to share new research, information, trends and analysis in order to enhance the profitability of our sector."

Wheelock holds an MBA from the University of Dallas and a BA from Washington and Lee University.

About CABA

The Continental Automated Buildings Association (CABA) is a leading industry association that promotes advanced technologies in homes and buildings in North America. More information is available at
