## **CABA to collocate Intelligent Buildings & Digital Home Forum at the Broadband Communities Summit**

August 19, 2014

The Continental Automated Buildings Association is pleased to announce that it will be partnering with Broadband Communities to collocate its next CABA's Intelligent Buildings & Digital Home Forum at the Broadband Communities Summit.

As the leading conference on broadband technologies for communities, the Broadband Communities Summit attracts broadband system operators, network builders and suppliers of all kinds. Major property owners and real estate developers within the United States attend the Summit each year, along with independent telcos and cable companies, municipal and state officials, community leaders and economic development professionals.

"We are pleased that CABA has selected Broadband Communities as the location for its Intelligent Buildings & Digital Home Forum and that the organization will be playing an active role at our event," states Scott DeGarmo, CEO at Broadband Communities. "CABA is recognized as a world leading information source for building and home automation. The strategic collocation of CABA's Intelligent Buildings & Digital Home Forum at the Broadband Communities Summit will provide our attendees with an additional source of intelligence in the fast changing world of commercial real estate automation."

CABA's Intelligent Buildings & Digital Home Forum brings together leading organizations involved in the integration of intelligent building systems and connected home technologies. CABA and Broadband Communities estimate that over 1,000 combined industry stakeholders will gather to discuss current trends in the intelligent and integrated buildings, connected home and telecommunications sectors.

Attendees will learn about current trends in the intelligent and integrated buildings and connected homes sectors, from a wide range of companies, working within the ecosystem and hear from CABA members and others who will share research and market insights.

The Forum is scheduled to be held April 14, 15 and 16, 2015 in Austin, Texas.

"We are extremely pleased to partner with Broadband Communities to offer the highest-quality information, programming and networking opportunities to our membership and attendees," stated Ronald J. Zimmer, CABA President & CEO. "The beneficial information and industry intelligence that CABA members will gain from both our event and the Broadband Communities Summit will exceed any expense involved in attending."
